EDUCATION

Dr. A.P.J. Abdul Kalam Technical University   Sept 2024 – Present
Bachelor of Technology, Computer Science and Engineering   **Grade**: *8.30 YGPA*

TECHNICAL PROFILE

- **Programming:** 2nd-year CSE student (**8.3 GPA**) with **160+ DSA problems** solved in **C++** across LeetCode and GFG.
- **National Recognition: IIT Bombay (i-HACK) 2nd Runner Up** & **SIH Top 10 Finalist** at College level (350 teams).
- **Systems Leadership: Systems Lead at ZenYukti (1,300+ members)**; architecting technical workflows and active open-source contributor.

PROJECTS & ACHIEVEMENTS

i-HACK (IIT Bombay E-Summit) | 2nd Runner Up

- **Secured 3rd position** in the national-level GitLab Codeforge Track at IIT Bombay, recognized for improving open-source accessibility and repository documentation workflows.
- **Built RepoInsight AI collaboratively**, a tool that automates repository evaluation and documentation generation using the Gemini API.
- **Enhanced developer productivity** by delivering automated code insights and project summaries, significantly simplifying and accelerating new contributor onboarding.

TECHNICAL SKILLS

- **Languages**: C++, C, Python, JavaScript, HTML, CSS.
- **Tools & Platforms**: Git, GitHub, GitLab, VS Code, Vercel, Netlify, Render.
- **Competencies**: Data Structures & Algorithms, OOP, Program Management, Team Leadership.

KEY METRICS & RECOGNITION

- **Problem Solving**: **160+** DSA problems solved across LeetCode, GeeksforGeeks, and CodeChef.
- **Smart India Hackathon (SIH)**: Shortlisted in the **Top 10 teams** among **350+ participating teams** at College.
- **Hacktoberfest**: Recognized for contributing to open-source projects through multiple accepted pull requests across diverse repositories.
- **InnoWar Hackathon**: Participated in a competitive innovation challenge focused on problem-solving and product development.
- **Hack4Health HealthTech Hackathon**: Participated in a domain-specific hackathon addressing real-world healthcare challenges

EXPERIENCE

ZenYukti | *Systems Lead*   Aug 2025 – Present
- **Designed and maintained scalable system workflows** for a 1,300+ member community by coordinating cross-functional processes between Technical, Systems, and Design teams, ensuring smooth execution of core community milestones.
- **Led system architecture and GitHub governance** for the organization, including repository structuring, branch strategy enforcement, access control, and release coordination for a React + Vite–based platform.

Hacktoberfest 2025 | *Contributor*   October 2025
- Contributed **6 pull requests to open-source** projects during Hacktoberfest using Python, C++, HTML, CSS, and JavaScript, focusing on bug fixes and feature enhancements.
- **Collaborated** with project maintainers by following standard contribution workflows, addressing review feedback, and ensuring code quality and consistency across submissions.
